

How can I help my child at home?

Children love to be creative. By providing them with some basic resources like pencils, pens and paper and the freedom to draw, they will happily develop their own skills and imaginations. However, there are also thousands of online videos which might inspire your child to improve their drawing skills. Best of all, spend time sitting at the table together drawing, colouring, painting, playing with modelling dough or collaging with recycled materials. Your input will make their experience all the more enjoyable.
