# PITMASTON POST

## CITIZENSHIP

Last week, 5T performed 'This is our school' during Singing Assembly. Their timing and volume were perfect and they executed singing in two groups excellently. Since then, some brave volunteers have had a go at singing solos in our weekly Class Choir slot. Well done 5T!

On Tuesday, RW made Pitmaston proud with their behaviour and respect when out of the school grounds visiting St John's Library. They walked sensibly and safely across roads and along paths with the guidance of adults. They were enthusiastic and were 'Listening Leopards' at the library and they were all 'Curious Cats' among the array of books they were offered to explore. Jenny, the Librarian, exposed the children to the range of books they can borrow and encouraged them to bring their parents along to support the St John's community. The children loved creating actions for a poem that was read aloud to them and they enjoyed listening to the story 'Whisper, Shout, Let It Out' which was fun and interactive. All adults supporting the trip were so proud of you RW! Visit the library and drive a passion for books and reading with your children - they loved the special time with us! Mrs Watson

# SATS

Our Year 6 pupils have been working extra hard preparing for some tests next week. Their knowledge is supreme and they are more than ready. We are looking forward to seeing them show just how brilliant they are and hope they take it all in their stride. Wishing everyone good luck!  
From a very proud Year 6 team.

This week Preschool have been learning all about the Pirates as part of our 'Going on an Adventure' topic. We have read the story of The Treasure of Pirate Frank, learnt all the names of the different pieces of equipment pirates need, made our own treasure maps and telescopes and had lots of enjoyment playing with pirate ships in the water tray. We rounded off the week with some swosh buckling fun dressed as pirates, we even found some real treasure buried in our very own nature garden.

2W have been finding out about the process of germination in their Science lessons. They studied lots of different types of seeds and decided on two groups to sort them in to. They enjoyed using the magnifying glasses to take a closer look at the sizes, colours and textures. Lots of children could talk about the seeds in different fruit that they eat.

The football team travelled to Whittington for their most recent fixture. Another slow start saw us fall two goals behind. After a shaky start, the boys found their rhythm and were the better team heading into half time. After half time, we were still on top but couldn't find the breakthrough. Finally, we found a way through when Charlie scored from close range and we looked like we were going to go on and grab an equaliser. However, as we were searching for the goal to bring the game level, Whittington scored two late goals and the game ended in a 4-1 defeat. The boys never gave up and the scoreline doesn't reflect the overall performance. Well done, boys.
